

INDEX, VOLUME 93

A

- ADEM, JULIAN:
Experiments aiming at monthly and seasonal numerical weather prediction. 495.
- ALAKA, M. A.:
and D. T. Rubsam. Evolution of the kinematic and thermal fields during the development of hurricane Ella (1962). 673.
- Albedo measurements, airborne Antarctica:
Oct.-Nov. 1962. 687.
1963. 697.
- ALDEN, ROBERT F.:
and G. J. Haltiner and Glenn C. Rosenberger. On the structure of pressure systems. 297.
- ANDERSON, C. E.:
and F. G. Finger and H. M. Woolf. A method for objective analysis of stratospheric constant-pressure charts. 619.
- ANDREWS, JAMES F.:
The weather and circulation of January 1965—Mild in the West and cold in the East. 269.
The weather and circulation of July 1965—A cool month associated with a large-amplitude wave over North America. 647.
- ANGELL, J. K.:
and D. H. Pack. A study of the sea breeze at Atlantic City, New Jersey using tetroons as Lagrangian tracers. 475.
- Antarctica, airborne albedo measurements:
Oct.-Nov. 1962. 687.
1963. 697.
- Atmospheric circulation, effect on Earth's magnetic field. 127.
- Atmospheric energy cycle:
Exchange between baroclinic and barotropic components. 79.
- Atmospheric motion, stationary harmonics of. 213.
- Atmospheric tides, related to precipitation variation. 93.

B

- BACH, W.:
and A. Garnett. An estimation of the ratio of artificial heat generation to natural radiation heat in Sheffield. 383.
- BARNETT, KENNETH M.:
and Omer Clarkson, Jr. Relation of the time interval to accuracy of double theodolite observations. 377.
- Bayes' theorem, in estimating false alarm rates. 557.
- BAYNTON, HAROLD W.:
Profiles of refractive index and humidity over the West Indies. 171.
- BERNSTEIN, ABRAM B.:
Dimensional analysis applied to the wind distribution in the planetary boundary layer. 579.
- Boundary-layer wind distribution, dimensional analysis. 579.
- Boundary-layer winds, southerly. 133.
- BOYD, JOHN G.:
Observation of two intersecting radar fine lines. 188.
- BRAHAM, ROSCOE R., JR.:
and Paul S. Spyers-Duran. An intense rainstorm at Fremont, Missouri, July 28-29, 1964. 387.

BRIER, GLENN W.:

Diurnal and semidiurnal atmospheric tides in relation to precipitation variations. 93.

BRODRICK, HAROLD J.:

and E. Paul McClain and Mary Ann Ruzecki. Experimental use of satellite pictures in numerical prediction. 445.

BROWNING, KEITH A.:

Comments on "Formation and steering mechanism of tornado cyclones and associated hook echoes." 639. [Reply. T. Fujita. 640.]

BRUNDIDGE, KENNETH C.:

The wind and temperature structure of nocturnal cold fronts in the first 1,420 feet. 587.

C

CLARKE, LEO C.:

and Robert J. Renard. Experiments in numerical objective frontal analysis. 547.

CLARKSON, OMER, JR.:

and Kenneth M. Barnett. Relation of the time interval to accuracy of double theodolite observations. 377.

Clear air turbulence, analysed from rawin data. 47.

Climatic changes, shown by tree rings, western North America. 421.

Clouds:

Atypical funnel cloud, Hawaii. 322.

CONOVER, JOHN H.:

Note on the flora and snow cover distributions affecting the appearance of northeastern United States as photographed by TIROS satellites. 644.

Correction notice. 92, 132, 268, 564, 654, 686.

COURT, ARNOLD:

and David Waco. Means and midranges of relative humidity. 517.

COWLEY, ANN D.:

and B. Haurwitz. The lunar and solar air tides at six stations in North and Central America. 505.

Cyclogenesis:

prediction by 2-level model. 663.

weather distribution in Colorado Lows. 359.

Cyclones:

vortex over Caspian Sea. 613.

D

DAVIS, PAUL A.:

TIROS III radiation measurements and some diabatic properties of the atmosphere. 535.

DELAND, RAYMOND J.:

Addendum to "Some observations of the behavior of spherical harmonic waves." 494.

Some observations of the behavior of spherical harmonic waves. 307.

Dew point, distribution in 48 states. 113.

DICKSON, ROBERT R.:

The weather and circulation of May 1965—Severe storms in Mid-Nation and continued drought in the Northeast. 528.

The weather and circulation of November 1964—Contrasting weather regimes related to long-wave progression. 123.

- DODD, ARTHUR V.:
Dew point distribution in the contiguous United States. 113.
- DRAKE, MARGARET:
and A. Wiin-Nielsen. On the energy exchange system between the baroclinic and barotropic components of atmospheric flow. 79.
- Drought, Northeast U.S. 528.
- DUNN, GORDON E.:
and Staff. The hurricane season of 1964. 175.
- ### E
- Earth's magnetic field, variation affected by atmospheric circulation. 127.
- ENDLICH, R. M.:
and R. L. Mancuso. On the analysis of clear air turbulence by use of rawinsonde data. 47.
- Energy transformations, calculations for N.H. 227.
- ERICKSON, CARL O.:
and Sigmund Fritz. Early history of tropical storm Katherine, 1963. 145.
- ### F
- FAWCETT, E. B.:
and H. K. Saylor. A study of the distribution of weather accompanying Colorado cyclogenesis. 359.
- FINGER, F. G.:
and H. M. Woolf and C. E. Anderson. A method for objective analysis of stratospheric constant-pressure charts. 619.
- Finite difference methods:
approximations to primitive equations. 1.
for fluid dynamics. 27.
for stationary harmonics of atmospheric motion. 213.
- FISCHER, GUNTER:
Comments on "Some problems involved in the numerical solutions of tidal hydraulics equations." 110. [Reply. D. Lee Harris and Chester P. Jelesnianski. 111.]
A survey of finite-difference approximations to the primitive equations. 1.
- Floods:
Northwest U.S., December 1964. 189.
April 1965. 465.
- Forecasts, numerical, experiments in monthly and seasonal. 495.
- FRITTS, HAROLD C.:
Tree-ring evidence for climatic changes in western North America. 421.
- FRITZ, SIGMUND:
and Carl O. Erickson. Early history of tropical storm Katherine, 1963. 145.
Revised illustration in "The variable appearance of the earth from satellites." 460.
- Fronts:
Comments on structure. 226.
Reply. 226.
Nocturnal cold, wind and temperature structure. 587.
Objective numerical analysis. 547.
- FUJITA, TETSUYA:
Formation and steering mechanism of tornado cyclones and associated hook echoes. 67.
Reply. 640. [to comments on "Formation and steering mechanism of tornado cyclones and associated hook echoes." K. A. Browning. 639.]
- ### G
- GALLOWAY, J. L.:
and G. M. Shimizu. Comments on "Structure of cold front near the center of an extratropical depression." 226. [Reply. Werner Schwerdtfeger and Norton D. Strommen. 226].
- GARNETT, A.:
and W. Bach. An estimation of the ratio of artificial heat generation to natural radiation heat in Sheffield. 383.
- GERMAN, KENNETH E.:
A contribution to the problem of stratospheric diffusion by large-scale mixing. 313.
- GERRITY, JOSEPH P., JR.:
Comments on "On the structure of pressure systems." 604. [Reply. G. J. Haltiner. 604.]
- GREEN, J. R.:
Two probability models for sequences of wet or dry days. 155.
- GREEN RAYMOND A.:
The weather and circulation of March 1965—A cold month with a strong blocking ridge in the Gulf of Alaska. 392.
The weather and circulation of August 1965—A cool month. 721.
- ### H
- HAINES, DONALD A.:
and Arthur F. Krueger and Jay S. Winston. Computations of atmospheric energy and its transformation for the Northern Hemisphere for a recent five-year period. 227.
- HALTINER, G. J.:
and Robert F. Alden and Glenn C. Rosenberger. On the structure of pressure systems. 297.
Reply. 604. [to comments on "On the structure of pressure systems." Joseph P. Gerrity, Jr., 604.]
- HARMANTAS, CHRISTOS:
and Mary W. Hodge. Computability of United States radiosondes. 93.
- Harmonic waves:
Spherical. 307.
Spherical, addendum. 494.
- HARRIS, D. LEE:
and Chester P. Jelesnianski. Reply. 111. [to comments on "Some problems involved in the numerical solutions in tidal hydraulics equations." Gunter Fischer. 110.]
- HARRIS, T. B.:
and W. D. Komhyr. Note on flow rate measurements made on Mast-Brewer ozone sensor pumps. 267.
- HAURWITZ, B.:
and Ann D. Cowley. The lunar and solar air tides at six stations in North and Central America. 505.
- Hawaii, atypical funnel cloud. 322.
- HAWKINS, HARRY F.:
and Stanley L. Rosenthal. On the computation of stream functions from the wind field. 245.
- Heat:
Ratio of artificial generation to natural radiation, Sheffield. 383.
Stationary sources and sinks, influence of vertical distribution. 417.
- HELLERMAN, S.:
Computations of wind stress fields over the Atlantic Ocean. 239.
- HILL, E. L.:
and William Malkin. Recurvature of hurricane Cleo, 1964, and associated 500-mb. streamline analysis. 565.
- HODGE, MARY W.:
and Christos Harmantas. Computability of United States radiosondes. 93.
- HOECKER, WALTER H.:
Comparative physical behavior of southerly boundary-layer wind jets. 133.
- HOLLOWAY, J. L., JR.:
and J. Smagorinsky and S. Manabe. Numerical results from a nine-level general circulation model of the atmosphere. 727.

HOLZWORTH, GEORGE C.:

A note on surface wind-speed observations. 323.

Hook echoes associated with tornadoes. 67.

HUGHES, LAWRENCE A.:

The prediction of surges in the southern basin of Lake Michigan.

Part III.—The operational basis for prediction. 292.

Humidity:

and refractive index profiles, West Indies. 171.

relative, means and midranges. 517.

Hurricanes:

the hurricane-tornado. 453.

distribution of tornadoes in. 461.

intensification of Cleo, August 1964. 444.

kinematic and thermal fields during development of Ella, 1962. 673.

recurvature of Cleo, 1964 and streamline analysis. 565.

season 1964. 175.

sounding in eye of Arlene to 108,760 ft. 380.

I

Indian Ocean, rainfall record at La Reunion. 331.

IRISH, SHIRLEY M.:

The prediction of surges in the southern basin of Lake Michigan.

Part II.—A case study of the surge of August 3, 1960. 282.

J

JELESNIANSKI, CHESTER P.:

and D. Lee Harris. Reply. 111. [to comments on "Some problems involved in the numerical solutions of tidal hydraulics equations." Gunter Fischer. 110].

A numerical calculation of storm tides induced by a tropical storm impinging on a continental shelf. 343.

K

KASAHARA, AKIRA:

On certain finite-difference methods for fluid dynamics. 27.

KOMHYR, W. D.:

and T. B. Harris. Note on flow rate measurements made on Mast-Brewer ozone sensor pumps. 267.

KRAFT, RAYMOND H.:

Rapid intensification of hurricane Cleo, August 1964. 444.

KRUEGER, ARTHUR F.:

and Jay S. Winston and Donald S. Haines. Computations of atmospheric energy and its transformation for the Northern Hemisphere for a recent five-year period. 227.

KURIHARA, YOSHIO:

Numerical integration of the primitive equations on a spherical grid. 399.

On the use of implicit and iterative methods for the time integration of the wave equation. 33.

L

LILLY, DOUGLAS K.:

On the computational stability of numerical solutions of time-dependent non-linear geophysical fluid dynamics problems. 11.

M

Magnetic field, Earth's and winds in lower ionosphere. 655.

MALKIN, WILLIAM:

and E. L. Hill. Recurvature of hurricane Cleo, 1964, and associated streamline analysis. 565.

MANABE, S.:

and J. Smagorinsky and J. L. Holloway, Jr. Numerical results from a nine-level general circulation model of the

MANABE, S.—Continued

atmosphere. 727.

and J. Smagorinsky and Robert F. Strickler. Simulated climatology of a general circulation model with a hydrologic cycle. 769.

MANCUSO, R. L.:

and R. M. Endlich. On the analysis of clear air turbulence by use of rawinsonde data. 47.

McCLAIN, E. PAUL:

and Mary Ann Ruzecki and Harold J. Brodrick. Experimental use of satellite pictures in numerical prediction. 445.

Missouri, Fremont. Intense rainfall, July 1964. 387.

Moisture and its easterly transport, Trinidad. 369.

Momentum transfer in 26-mo. oscillation. 157.

Comments on. 704.

Reply. 704, 720

Further comments. 720

Mountain slope observations, compared to radiosonde observations. 327.

MYERS, VANCE A.:

Moisture and easterly moisture transport at Trinidad. 369.

N

NEWTON, CHESTER W.:

Variations in structure of subtropical current system accompanying a deep polar outbreak. 101.

Numerical analysis:

of fronts. 547.

of stratospheric charts. 619.

Numerical calculation of storm tides. 343.

Numerical integration of primitive equations on spherical grid. 399.

Numerical model of atmosphere:

nine-level. 727.

with hydrologic cycle. 769

Numerical prediction:

of cyclogenesis by 2-level model. 663.

use of satellite pictures in. 445.

Numerical solution:

of wave equation. 33.

of fluid dynamics problems, stability of. 11

to tidal hydraulics equations, comments on. 110. Reply. 111.

Numerical weather predictions, monthly and seasonal. 495.

O

O'CONNOR, JAMES F.:

The weather and circulation of October 1964—An unusually dry month. 59.

The weather and circulation of April 1965—Disastrous floods and tornadoes in the Midwest. 465.

OI, MASAMICHI:

and Mitsuru Sekioka. Synoptic analysis of the perturbation of an overrunning current by the intrusion of cold air. 163.

ØKLAND, HANS:

An experiment in cyclogenesis prediction by a two-level model. 663.

OLSON, ROGER H.:

On the use of Bayes' theorem in estimating false alarm rates. 557.

Oscillation, 26-mo., momentum transfer in. 157.

Overrunning current, perturbation caused in by cold air intrusion. 163.

Ozone sensor pumps, flow rate measurements of. 267.
